EXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: EP-A-0 062 867 (PALL CORP) 20 October 1982 (1982-10-20)

D2: DE 199 19 289 A (MAHLE FILTERSYSTEME GMBH) 2 November 2000

(2000-11-02)

1- ARTICLE 33 (3) PCT - INVENTIVE STEP

The present application does not meet the requirements of Article 33(1) PCT, because the subject-matter of claims 1-36 does not involve an inventive step in the sense of Article 33(3) PCT.

1.1- Independent apparatus claim 1

Document D1, which is considered to represent the most relevant state of the art, discloses (cf. page 8 line 16 - page 10 line 16; page 19 lines 5-9; fig. 3) a filter cartridge from which the subject-matter of claim 1 differs in that the first disc (or outer disc) is made from thermoplastic.

The problem to be solved by the present invention may therefore be regarded as to simplify the manufacturing process of the filter cartridge (fewer process steps: for instance by avoiding any pre-etched step - D1, page 10 line 6).

The solution proposed in claim 1 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

The feature " first and second disc of the end cap made from thermoplastic" is described in document D2 as providing the same advantages as in the present application. The skilled person would therefore regard it as a normal option to include this feature in the filter cartridge described in document D1 in order to solve the problem posed.

Furthermore document D1 states "any plastic or resinous material or any metallic

material resistant to corrosive attack and having a softening point above the temperature of use of the polymer filter can be employed for the end caps".

1.2- Dependent claims 2-36 do not contain any features which, in combination with the features of any claims to which they refer, meet the requirements of the PCT in respect of inventive step.
